

# Massachusetts Online Government Projects

Agency Name	Project Name	Status	Project Description
BUR OF SPECIAL INVESTIGATIONS	Investigator's System	Concept	Allow BSI investigators, located throughout MA, to connect to the BSI tracking system. Currently implemented using dial-up connections. Goal is to convert to Web access.
CAMPAIGN & POLITICAL FINANCE	OCPF Website	Implementation	Establish and maintain agency website on Internet to provide information
COMMITTEE FOR PUBLIC COUNSEL	PC BILL	Pilot	Personal computer system to process 300,000 invoices for attorney fees from 3,000 state attorneys. The software for each attorney to use for billing will be downloaded by that attorney to their PC via the CPCS Web page.
DEPARTMENT OF CORRECTION	Inmate Research Statistics project	Concept	The DOC frequently provides statistical information regarding the inmate population to outside agencies, schools, and other interested parties. The information is wide in scope, and not confidential. Additionally, there are federal reporting mandates. A web-based system will save research time, allowing staff to focus on other application priorities.
DEPARTMENT OF POLICE	VICAP WEB	Concept	Web-ify VICAP data base to streamline data input from Commonwealth Police departments, the project will be completed in stages, from a small pilot application to a more complete roll out.
DEPARTMENT OF PUBLIC HEALTH	Vaccine Inventory Management	Concept	Web browser application for the inventory management of vaccines
DEPARTMENT OF PUBLIC HEALTH	Mass. Immunization Information System	Concept	This statewide immunization registry for the Commonwealth is a client/server application that uses an X.25 Packet Switching Network to exchange information with doctors' offices. The application will be enhanced to use the Internet in a secure manner for the transmission of data.
DEPARTMENT OF PUBLIC HEALTH	Communicable Disease Reporting	Concept	Web browser application for the reporting of communicable diseases

Agency Name	Project Name	Status	Project Description
DEPARTMENT OF PUBLIC HEALTH	MassCHIP	Design	Existing application that provides access to public health information databases is being enhanced to provide Web access. Current application requires download of PC client software and uses dial-up connections.
DEPARTMENT OF REVENUE	Telefile Tax Calculator	Implementation	An online worksheet calculator to assist in the calculation of tax returns. Users can input various tax information into the calculator, which computes tax information. Users can use the output to assist with tax return preparation.
DEPT ENVIRONMENTAL MANAGMENT	Camping Reservation/Registration	Procurement	An outsourcing project to provide the camping public the ability to make campground reservations in DEM's 29 camping facilities. It is envisioned that reservations will be accepted via telephone, and through a vendor hosted Web site.
DEPT HOUSING & COMM DEVELOPMT	Client and Fiscal Management System (CAFMIS)	Implementation	Client and Fiscal Management System has several modules and allows end-users to input data via Web, for various OCD applications.
DIV OF OPERATIONAL SERVICES	Comm-PASS	Implementation	One-stop comprehensive procurement, advertising and document distribution system including: solicitations for goods and services, contract bidders and awarded vendors lists, a business registry database, access to active state contracts, announcements of contract awards, and other relevant information such as procurement regulations and information on becoming a vendor with the State.
DIV OF OPERATIONAL SERVICES	Multi-State E-Mall	Pilot	The E-Mall is a multi-state, Extranet-based purchasing system with tight integration to both MMARS and participating vendors' ordering systems. Vendors will maintain a storefront which state staff will be able to browse at their desktop and build a requisition that is then routed for funds availability and encumbrance. The E-Mall will be available for the purchase of blanket commodities or services by authorized users.

Agency Name	Project Name	Status	Project Description
EO HEALTH & HUMAN SERVICES	Client Index	Development	List of clients from several HHS agencies containing basic identifying information and pointers to agency systems with start and end of service dates. Includes automated database update from agencies, via CommBridge through a batch process. Accessible to EOHHS agencies through an Intranet site.
EXEC OFFICE ENVIRONMENTAL AFFS	Internet Access to GIS	Development	Provide Internet access to GIS data using a browser interface, provide map information for MEPA, and other agencies to assist in the permitting process.
EXEC OFFICE OF PUBLIC SAFETY	Public Safety's Non-Confidential Information	Development	Provide non-confidential data to public from EOPS agencies
FISHERIES WILDL ENVIR LAW ENF	SPORT	Procurement	Department of Fisheries and Wildlife online fishing, hunting, ATV & marine permit and licensing system
HOLYOKE COMMUNITY COLLEGE	Student registration over the Web	Concept	Enable students to register for classes over the web.
HOLYOKE COMMUNITY COLLEGE	Student access to personal information	Implementation	Student Access to personal information, schedules, etc
MASS AERONAUTICS COMMISSION	Airport Information Management System (AIMS)	Design	Data Base of aviation data on all airports in MA under MAC jurisdiction (44). Currently access is through dial-up but would like to make accessible through the Web.
MASSACHUSETTS HIGHWAY DEPT	Federal Highway Electronic Data Exchange	Development	Provide Network Access to General Highway and Mass Highway networks
MASSACHUSETTS HIGHWAY DEPT	Incident Management	Concept	Coordinate incident response activity with Mass Highway and other city and state agencies, e.g. fire, police, ambulance
MASSACHUSETTS HIGHWAY DEPT	Traffic Video Information	Concept	Display traffic surveillance video on Internet
MASSACHUSETTS HIGHWAY DEPT	GIS Map	Concept	Provide GIS maps hotlinked to a database of construction sites, road closures, visitor centers, etc.
MT WACHUSETT COMMUNITY COLLEGE	Distance Learning	Design	Allows students to enroll in credit courses from off-campus sites via the Internet.

Agency Name	Project Name	Status	Project Description
NORTH SHORE COMMUNITY COLLEGE	Banner Web for Students	Concept	Web page for student services including application, payments, inquiries.
NORTH SHORE COMMUNITY COLLEGE	EDE, Electronic Data Exchange	Implementation	Enable Financial Aid Office to send and receive financial aid information, specifically a student's Financial Aide Form, electronically to Federal Higher Education agencies.
OFFICE FOR CHILDREN	Child Care Administration System	Development	Centralized database for child care services with the following components: 1. Information and referral, 2. Uniform intake and eligibility (waiting list management), and 3. Billing, payment and reconciliation. The last component will be developed after 1/1/99. The system will be available for query and data input to a large number of state agency and vendor locations throughout the Commonwealth.
OFFICE OF STATE COMPTROLLER	MassFinance	Implementation	<p>ManagerMMARS - This component is targeted to meet the needs of Commonwealth managers. It will include a specific set of business functions grouped for easy use through a Web front-end with added functionality such as the ability to run budget and spending scenarios.</p> <p>VendorWeb - Web-based facility for vendors to update their vendor information and also check other information such as payments status.</p> <p>CommonCents - Easy to use Information Warehouse-based Executive Information System with flexibility for disparate users (state, vendor, citizen) to access useful and frequently requested financial information. Staged Warehouse and Debt System data will be used to provide 7 x 24 availability.</p>
REGISTRY OF MOTOR VEHICLES	Express Lane	Development	A Web based application which provides a number of transactions including registration renewals and citation payments. There are a series of planned additions to this application, including special plate purchases, scheduling road test exams, and submission of accident reports.

<b>Agency Name</b>	<b>Project Name</b>	<b>Status</b>	<b>Project Description</b>
SECRETARY OF STATE	Corporation Division Electronic Filing	Design	Establish Electronic filing capabilities, via the Web, for corporations to file Annual Reports and UCC documents
SECRETARY OF STATE	Lobbyist Data Base	Implementation	Data base of registered lobbyist information, supporting inquiries from to the General Public.
SECRETARY OF STATE	Voter Information	Implementation	Voter information online data base, search engine to provide voting and elected official information.
